

Anti-Ligature Window Protector Inset

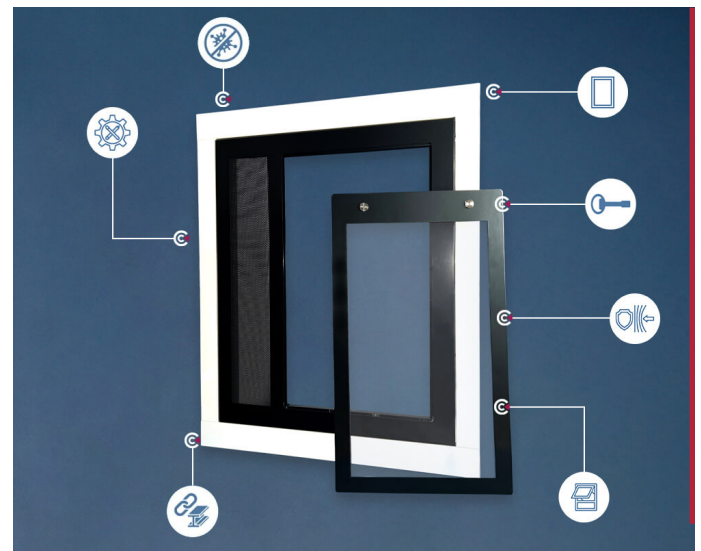

Overview

Secure your environment effectively and affordably with Contour's Anti-Ligature Window Protector Inset. This advanced solution is specifically engineered to reduce risks associated with glass windows, handles, and hinges, making it ideal for a wide range of settings, including Special Educational Needs (SEN), Special Educational Needs and Disabilities (SEND), Additional Support Needs (ASN), Additional Learning Needs (ALN), Pupil Referral Units (PRU), NHS facilities, healthcare settings, and private care institutions. By installing Contour's Window Protector, you ensure a safer and more secure environment, promoting well-being and peace of mind for all occupants.

Key Features

Contour's Anti-Ligature Window Protector Inset offers enhanced security for your environment. Crafted from durable materials for long-lasting use, it is designed for easy installation and low maintenance. This protector ensures privacy, reduces noise, and improves energy efficiency, creating a safer and more comfortable space for both patients and staff.

Tailored to fit various window sizes and types, it is ideal for settings such as SEN, SEND, ASN, ALN, PRU, NHS facilities, healthcare settings, and private care institutions, ensuring a secure and therapeutic environment.

Robust Construction:

Crafted from 2mm thick Zintec Steel frame, the Window Protector ensures durability and resilience against impacts, making it ideal for high-security settings.

Impact-Resistant Vision Panel:

8mm thick polycarbonate vision panel provides exceptional strength while offering flexibility to absorb impacts, surpassing the standards of traditional riot shields.

Replaceable Window:

Easily replace damaged polycarbonate vision panel without replacing the entire frame, ensuring cost-effectiveness and convenience.

Anti-Microbial Coating:

Powder-coated in RAL 9003 white with BioCote anti-microbial technology, the frame enhances hygiene and cleanliness in sensitive environments.

Secure Locking Mechanism:

Operated by two Contour Secure Security locks, the door provides staff with easy access while maintaining user safety and comfort.

Flush Frame Design:

The door sits within a frame of the same thickness, minimising gaps and maintaining tight tolerance for enhanced security.

Customisable Grilles:

IP3X rated grilles, punched directly into the frame, prevent the passage of items larger than 2.5mm, offering reliable security without compromising airflow. Grilles can be configured horizontally or vertically to suit the way the window operates in order to maximise ventilation.

Specification

Finish

- Polyester powder coated RAL 9003 as standard
- Patented BioCote® anti-microbial agent as standard
- Other RAL colours available

Fixing

- All fixings internal
- Contour Secure indicator door locks as standard

Sizing

- Bespoke sizing
- Modular design allows for large areas to be covered

Environments

- Mental Health Units
- 136 Suites
- Psychiatric Intensive Care Units (PICU)
- SEN Schools
- Households supporting people with additional complex needs

Adaptability

Contour Window Protectors can be adapted to suit a number of different substrates. They can be surface mounted or set with the window reveal. If there are more ornate window reveals, the design can either be mounted off the wall with a timber frame work or a separate chamfered metal framework.
